# Course's resources

## Course's portal on Cyberlearn

- <https://cyberlearn.hes-so.ch/user/index.php?id=6961>
- enrollment key: "CP-40"

## Course's content on git

- day students: [https://gitedu.hesge.ch/flg\\_courses/virtualization/virtualization\\_pub\\_jour](https://gitedu.hesge.ch/flg_courses/virtualization/virtualization_pub_jour)
- evening students: [https://gitedu.hesge.ch/flg\\_courses/virtualization/virtualization\\_pub\\_soir](https://gitedu.hesge.ch/flg_courses/virtualization/virtualization_pub_soir)

## Course's chat on Mattermost

- day students:  
[https://mattermost.hepiapp.ch/signup\\_user\\_complete/?id=gga89dgb5ffbp8xk859knqdjeh](https://mattermost.hepiapp.ch/signup_user_complete/?id=gga89dgb5ffbp8xk859knqdjeh)
- evening students:  
[https://mattermost.hepiapp.ch/signup\\_user\\_complete/?id=xxn7d5yj9pysdfw5fnmskkj5io](https://mattermost.hepiapp.ch/signup_user_complete/?id=xxn7d5yj9pysdfw5fnmskkj5io)

# Goals

- Acquire a good understanding of virtualization concepts, their technologies, and their use

# Goals

- Acquire a good understanding of virtualization concepts, their technologies, and their use
- Understand how hypervisors work and the concepts behind their implementation

# Goals

- Acquire a good understanding of virtualization concepts, their technologies, and their use
- Understand how hypervisors work and the concepts behind their implementation
- Understand key aspects of how containers work

# Goals

- Acquire a good understanding of virtualization concepts, their technologies, and their use
- Understand how hypervisors work and the concepts behind their implementation
- Understand key aspects of how containers work
- Be able to configure and deploy virtual machines and containers

- Introduction to virtualization

- Introduction to virtualization
- Platform virtualization

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU
  - Hypervisor implementation with KVM

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU
  - Hypervisor implementation with KVM
- Storage virtualization with LVM

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU
  - Hypervisor implementation with KVM
- Storage virtualization with LVM
- Operating system virtualization (containers)

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU
  - Hypervisor implementation with KVM
- Storage virtualization with LVM
- Operating system virtualization (containers)
  - LCX

- Introduction to virtualization
- Platform virtualization
  - VirtualBox, QEMU
  - Hypervisor implementation with KVM
- Storage virtualization with LVM
- Operating system virtualization (containers)
  - LCX
  - Docker

# Course organization

- 5/6 periods/week over 8 weeks<sup>1</sup>

---

<sup>1</sup>might be more given school breaks and/or exceptional cancellations

# Course organization

- 5/6 periods/week over 8 weeks<sup>1</sup>
- Sessions of theory followed by practical labs

---

<sup>1</sup>might be more given school breaks and/or exceptional cancellations

- **Take notes** as slides are **incomplete**

- **Take notes** as slides are **incomplete**
- Work on a **regular basis**: last minute work won't cut it 😞

## Work method

- **Take notes** as slides are **incomplete**
- Work on a **regular basis**: last minute work won't cut it 😞
- Please **ask questions**, there are no dumb questions 😊

- **Take notes** as slides are **incomplete**
- Work on a **regular basis**: last minute work won't cut it ☹️
- Please **ask questions**, there are no dumb questions 😊
  - no questions = I assume everything is understood...

- **Take notes** as slides are **incomplete**
- Work on a **regular basis**: last minute work won't cut it 😞
- Please **ask questions**, there are no dumb questions 😊
  - no questions = I assume everything is understood...
- Don't **blindly** copy/paste code found elsewhere (hello stackoverflow and chatgpt!)

# Work method

- **Take notes** as slides are **incomplete**
- Work on a **regular basis**: last minute work won't cut it 😞
- Please **ask questions**, there are no dumb questions 😊
  - no questions = I assume everything is understood...
- Don't **blindly** copy/paste code found elsewhere (hello stackoverflow and chatgpt!)
  - the goal is that **you understand** what you're doing!

- Labs are not graded
- Labs are exercises to practice and get ready for the live exams
- **Very important** to work and complete the labs, otherwise failing the class is almost guaranteed 😞

- Evaluation:
  - 2 written exams on theory
  - 2 live exams similar to labs
- Written + live exams might be grouped together (not yet decided)
- Final grade: 50% written exams, 50% live exams

# Questions
